Table Filter and Charts 3.3.1

New in this release

- Removed the message about the unavailability of the data table in the macro body in the page edit mode.

Fixed in this release

- Resolved the issue with the Hide Columns option that did not hide the column names in the table header with the enabled Fit to Screen Area option.
- Resolved the issue with the recurrent incorrect initialization of the table generated by Page Properties Report macro causing problems with display of the filtration pane.
