

# Table Filter and Charts 8.3.0

## New in this release:

- Reverted to the date format dots display instead of hyphens for NOW() function in Table Transformer.
- Added new functions for Table Transformer: CONCAT\_VIEW, REPLACE\_VIEW, SUBSTRING\_VIEW - preserving original formatting.

## Fixed in this release:

- Resolved the issue with the content undisplayed in the Table Excerpt/Table Excerpt Include preview mode.
- Resolved the issue with multiple link symbols rendered as asterisks in Table from CSV when using wiki markup.
- Resolved the issue with incorrect row width setting in Table Filter.
- Resolved the issue with the Inline Macro Insertion icons displayed within the Conifirms Form Definition macro.
- Resolved the compatibility issue of Table Filter with the Insight Object macro.
- Resolved the issue of incorrect sorting by the International Date Format(16.03.2022) in Table Spreadsheet.
- Resolved the issue of Table Spreadsheet breaking with the attachment not found.
- Resolved the compatibility issue of Chart From Table with the Two-Dimensional Filter Statistics gadget.
